PRABASWARA SHAFA A

Jl. Maera Sari III, Tembalang, Semarang • 089526861571 • azshafa95@gmail.com

SUMMARY

Computer Engineering student with experience in backend development, database management, and software application development. Familiar with software testing, API validation, debugging, and defect identification. Experienced in working with PHP, MySQL, Flutter, and Python. Interested in Software Quality Assurance and passionate about ensuring software quality through systematic testing and problem-solving.

EDUCATION

Politeknik Negeri Semarang — Computer Engineering Technology **2023 – Present**

- Studied software engineering, database systems, software testing, and application development.
- Learned software quality assurance principles, debugging techniques, and testing methodologies.
- Developed analytical and problem-solving skills through academic and project-based activities.

SMK Negeri 3 Kota Tegal — Computer and Network Engineering **2020 – 2023**

- Learned technical problem-solving, system troubleshooting, and computer networking fundamentals.
- Built a foundation in software, hardware, and information technology systems.

PROJECT EXPERIENCE

Cetaku – Online Printing Service Platform

- Developed an online printing service platform with product ordering and payment processing features.
- Designed and executed functional testing scenarios for authentication, ordering, and payment workflows.

Sigma – Sistem Informasi Organisasi Mahasiswa

- Developed a student organization management system for registration, events, and activities.
- Built admin modules to manage members, activities, and organization information.

AutoClipper AI – AI-Powered Video Clipping Platform

- Developed an AI-powered platform for automated video clipping, subtitle generation, and content rendering.
- Tested and validated clip generation, automatic upload, and API integration workflows to ensure reliable performance.

LICENSES & CERTIFICATIONS

Database Programming with SQL — Oracle Academy **Juni 2026**

- Learned Python fundamentals, OOP, and unit testing concepts.

Database Programming with SQL — Oracle Academy **Juni 2024**

- Learned SQL fundamentals including querying, filtering, joins, aggregation, and subqueries.
- Applied SQL techniques for data retrieval, analysis, and database management.

Database Design — Oracle Academy **March 2024**

- Learned relational database design, including ERD, normalization, and data modeling.
- Applied SQL for data retrieval and database management.

ADDITIONAL INFORMATION

- **Technical Skills :** Laravel, Flutter, PHP, SQL, Python, MySQL, REST API Development, API Integration, Postman, Git/GitHub, Debugging, Functional Testing, Test Case Design
- **Languages :** Indonesian (Native), English (Basic–Intermediate, actively improving)
